

The Making Cancer History® Award

MD Anderson's mission is to eliminate cancer in Texas, the nation and the world through outstanding programs that integrate patient care, research and prevention, and through education for undergraduate and graduate students, trainees, professionals, employees and the public.

Those who walk the path with MD Anderson in Making Cancer History® share the same compassion, dedication, desire and determination to make life better for patients and their loved ones dealing with cancer's challenges. The Making Cancer History award is given to people who truly make a difference in the lives of others by demonstrating the institution's core values of caring, integrity and discovery.
